Copyright exception for accessible formats

Copyright constitutes one of the most challenging barriers in the access to information of persons with sensory impairments. Among the 50 countries with copyright exemptions, India’s approach stands out as it is inclusive and non-bureaucratic, catering to the needs of persons with disabilities living in the Global South.

**COPYRIGHT AMENDMENT ACT NO. 27**

- **Year of existence:** 2012
- **Country/region of origin:** India
- **Beneficiaries targeted:** All persons with disabilities
- **Responsible body:** Ministry of Human Resource Development
- **Stakeholders:** Public, private and nonprofit sector

**FACTS & FIGURES**

- As of 2013, 95 Indian members of DAISY (Digital Accessible Information System) have converted 25,000 books which are available to some 50,000 users.
- All 150-200 million Indians with disabilities could potentially benefit.
- In 2014 an online Braille library will provide books in accessible formats.

**HISTORY**

Several steps contributed to start the debate about changing India’s copyright law: the formation of the DAISY Forum of India in 2007, the establishment of the NGO Centre for Internet and Society, Inclusive Planet and of Bookshare India, as well as the launch of the Right to Read Campaign with a broad coalition of civil society, academia, media, authors and publishing houses in 2009. This coalition discussed intensely the draft amendment and presented a detailed report to the Government, which highlighted best practices of copyright exceptions for persons with print disabilities in other countries. As a result, the final Copyright Amendment Act No. 27 of 2012 included special provisions for the benefit of persons with disabilities. At the same time India began to play a significant role in the negotiations for a new WIPO treaty, which was adopted in 2013 and which facilitates the cross-border exchange of accessible format copies and requires countries to enact domestic copyright exceptions.

**INNOVATIVE ASPECTS**

Multi-stakeholder advocacy

Sound research, multiple advocacy strategies (collaborating with parliamentarians, the media, large publishing houses) and the involvement of persons with disabilities led this campaign to be a success.

The widest possible copyright exception

As long as the converter ensures that converted formats are only accessed by persons with disabilities, the non-profit role in the negotiations for a new WIPO treaty, which was adopted in 2013 and which facilitates the cross-border exchange of accessible format copies and requires countries to enact domestic copyright exceptions.

**KEY FEATURES**

The Copyright Amendment Act No. 27 of 2012 updates India’s copyright law and includes amendments facilitating access to works. Concerning specifically the access barriers of persons with disabilities to a wide abundance of works, despite technological advances, the Act envisages three activities:

- Conversions by the disabled person for his/her own use and for sharing with others in the community
- Conversions by third parties working for the benefit of the disabled on a non-profit basis.

As long as the converter (any person or organisation) operates on a non-profit basis and ensures that converted formats are only accessed by persons with disabilities, § 52(1)(zb) permits the conversion of a copyrighted work to any accessible format. It is very important to note that the exception extends not only to persons with print/reading disabilities/visual impairments, but to any person with a disability requiring a special format to access the work.

- Conversions by for-profit organisations For the for-profit conversion, the entity can apply for a compulsory license under §31(B). The Copyright Board has to dispose such application within a period of two months from the date of receipt of application.

**IMPLEMENTATION**

As no license is needed for making works accessible on a non-profit basis, conversion work by disabled people’s organisations started immediately after the Act came into force. The provisions allow for easy and non-bureaucratic use. As for making works accessible on a profit basis, one needs to apply for a license, which is issued by the Copyright Board within two months. The Copyright Board is about to be established. Currently its director is being selected. It will be fully functional by the end of 2013. In case of infringement of the Act, its Section 63 provides for sanctions, which can include imprisonment between 6 months and 3 years, and/or fines up to 200,000 Rupees.

**INNOVATIVE POLICY 2014: INDIA**

Every country should have the widest possible copyright exception permitting the conversion of books and other cultural material into accessible formats for persons with disabilities.«
